Re: Docket No. 50-250 - Turkey Point Unit No. 3
Containment Mat

Dear Dr. Morris:

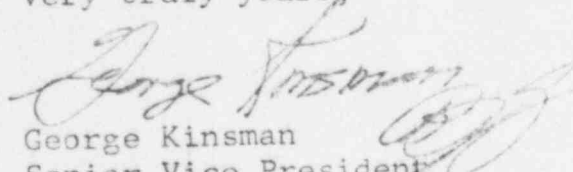

In accordance with discussions held with members of your staff, it was agreed to perform additional sonic tests on Turkey Point Unit No. 3 containment mat in order to evaluate the repairs which were made on this mat. These repairs were the subject of a transmittal to you dated August 14, 1968, and a supplemental transmittal dated November 1, 1968. The repairs were approved by you in your letter to us dated November 19, 1968.

Enclosed are 25 copies of a report entitled "Soniscope Investigation of the Turkey Point Plant Unit No. 3 Containment Mat".

We are also forwarding a copy of the above report to the Atlanta office of the Division of Compliance.

Should you desire any further information on this matter, we would be most happy to furnish it.

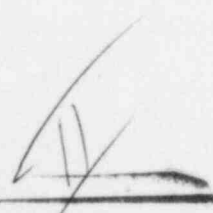

Very truly yours,

George Kinsman
Senior Vice President
