Dr. Clyde Kesler
2129 E. Civil Engineering Building
University of Illinois
Urbana, Illinois 61801

Dear Dr. Kesler:

After much delay, we have received a report from the Florida Power and Light Company (FP&L) covering the concrete void problem which you observed in April. We are enclosing a copy for your use in providing us your evaluations of the void problem and the proposed FP&L corrective action. Please forward copies of your report to the following:

Mr. Frank Long
U. S. Atomic Energy Commission
Suite 918
230 Peachtree Street, N. W.
Atlanta, Georgia 30303

Mr. G. W. Reinmuth
Division of Compliance
U. S. Atomic Energy Commission
Washington, D. C. 20545

Since there is a limited distribution of the FP&L report, we request that you return the enclosed copy when you finish your review.

If you have any questions, please feel free to call either Mr. Long (404-526-4537, Atlanta, Ga.) or myself (301-973-7353, Bethesda, Md.) Thank you for your cooperation.

Sincerely yours,

Original signed by
G. W. Reinmuth
