

Federal Emergency Management Agency

Washington, D.C. 20472

MAY 22 1991

Mr. Frank J. Congel, Director
Division of Radiation Protection
and Emergency Preparedness
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Congel:

Enclosed is a copy of the final exercise report for the July 11, 1990, joint exercise of the offsite radiological emergency response plans site-specific to the Sequoyah Nuclear Power Plant. The State of Tennessee and Bradley and Hamilton Counties, Tennessee, participated in the exercise. The final exercise report was prepared by the Region IV staff of the Federal Emergency Management Agency (FEMA). A copy of this report will be provided to the State of Tennessee by the FEMA Region IV staff.

There were no Deficiencies identified during this exercise. There were, however, six Areas Requiring Corrective Action identified during this exercise. FEMA Region IV staff will monitor the status of the corrective actions.

Based on the results of the July 11, 1990, exercise, the offsite radiological emergency response plans and preparedness for the Sequoyah Nuclear Power Plant are adequate to provide reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public in the event of a radiological emergency at the site. Therefore, the Title 44 CFR, Part 350, approval of the offsite radiological emergency response plans and preparedness site-specific to the Sequoyah Nuclear Power Plant, granted on August 7, 1980, will remain in effect.

If you should have any questions, please contact Mr. Craig S. Wingo, Chief, Radiological Preparedness Division, at (202) 646-3026.

Sincerely,

Dennis H. Kwiatkowski
Assistant Associate Director
Office of Technological Hazards
