

June 30, 1995

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D.C. 20555

ComEd

SUBJECT: Correction to Commonwealth Edison BWR Transient Analysis
Methods Licensing Topical Report
LaSalle County Nuclear Power Station Units 1 and 2
NPF-11 and NPF-18; NRC Docket Nos. 50-373/374
Dresden Nuclear Power Station Units 2 and 3
DPR-19 and DPR-25; NRC Docket Nos. 50-237/249
Quad Cities Nuclear Power Station Units 1 and 2
DPR-29 and DPR-30; NRC Docket Nos. 50-254/265

REFERENCE: G. Benes letter to USNRC, dated June 26, 1995.

The Reference letter requested NRC review for Commonwealth Edison (ComEd) licensing topical report (LTR) NFSR-0111, Rev. 0, "BWR Transient Analysis Methods". On page 2 to the LTR is a "Release of Information Statement", that implies that the document is proprietary. This "Release of Information Statement" should not have been included in the LTR, since there is no proprietary information contained within the LTR. In summary, the licensing topical report (LTR) NFSR-0111, Rev. 0, "BWR Transient Analysis Methods" is nonproprietary and does not need to be withheld from public disclosure pursuant to 10 CFR 2.790.

We regret any inconvenience this problem may have caused. Please direct any questions you may have concerning this matter to this office.

Sincerely,

Gary G. Benes

Gary G. Benes
Nuclear Licensing Administrator
