NOTICE OF VIOLATION

Iowa Electric Light and Power
Duane Arnold Energy Center

Docket No. 50-331
License No. DPR-49

As a result of the inspection conducted between October 21 and 29, 1991 and in accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, (1991) (Enforcement Policy) the following violation was identified:

10 CFR 26.27(a) requires that the licensee complete a suitable inquiry on a best-efforts basis to determine if a person, in the past, tested positive for drugs or use of alcohol that resulted in on-duty impairment, was subject to a plan for treating substance abuse (except for self-referral for treatment), was removed from activities within the scope of this Part, or was denied unescorted access at any other nuclear power plant in accordance with a fitness-for-duty policy.

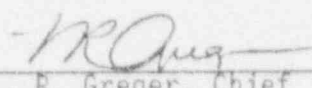

Contrary to the above, on October 23, 1991, the inspector identified that the licensee failed to complete a suitable inquiry on a best-efforts basis for a licensee employee. Additional review identified 14 additional cases of inadequate suitable inquiries.

This is a Severity Level IV violation (Supplement VII).

The inspection showed that steps had been taken to correct the identified violation and to prevent recurrence. Consequently, no reply to the violation is required and we have no further questions regarding this matter.

NOV 22 1991
