

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

NOV 19 1991

MEMORANDUM FOR: Nuclear Document System (NUDOCS)

FROM: William R. Jones
Office for Analysis and Evaluation
of Operational Data

SUBJECT: REGULATORY HISTORY PACKAGE FOR FINAL
RULEMAKING FOR 10 CFR 21 AND §50.55(E) -
DESIGNATOR "AA68-2"

Enclosed is the regulatory history package containing documents for the above final rulemaking. These documents should be assigned a designator of "AA68-2."

The collection is in five parts. The first part (Enclosure 1A) is a list of documents currently in the public document room (PDR) and on NUDOCs which should be associated with this rulemaking activity. Enclosure 1B is a list of public comments concerning the rulemaking currently in the PDR which should be associated with the rulemaking. The third list (Enclosure 1C) is a list of documents currently in the central files (CF) and on NUDOCs. These documents (Enclosures 1A, 1B, and 1C) are in the correct location (CF versus PDR) and should be associated with the rulemaking.

Enclosure 2A provides a list and collection of documents associated with the rulemaking which should be placed in PDR. Enclosure 2B provides a list and collection of documents associated with the rulemaking which should be placed in CF.

As requested, documents in Enclosures 2A and 2B are marked with the designator and the appropriate letters ("PDR" or "CF"). I could not find the documents in Enclosures 2A and 2B on NUDOCs. I exercised reasonable care in attempting to find the documents. However, it is possible I may have missed some. Some of the documents in Enclosure 2A are in CF but should be placed in the PDR.

If you have questions, please contact me at 492-4442.

W. R. Jones
William R. Jones
Office for Analysis and Evaluation
of Operational Data

Enclosure: As stated

As requested, the Federal Register Notice concerning the final rule is 56 FR 36081. The published title is "CRITERIA and Procedures for the Regulation of ~~the~~ ^{the} Design and Construction Permits."
