SUBJECT: Draft EPRI Report TR-105505, "Burst Pressure
Correlation for Steam Generator Tubes with Throughwall
Axial Cracks"

In our letter dated August 31, 1995, to Mr. William T. Russell, we transmitted the NRC six technical reports as part of the EPRI Steam Generator Radiation Specific Management (SGDSM) initiative. This letter transmits the subject report as an addition to those previously submitted. Enclosure 1 is three copies the proprietary version of the subject report and enclosure 2 is three copies the non-proprietary version of the same report.

Please note that the proprietary version of the enclosed document should be withheld from public disclosure in accordance with letters detailing this request in enclosures 3 and 4.

Sincerely,

R. Clive Callaway
