Julian, WV 25529

Dear Mr. White,

This letter is to confirm that the following fixed gauge topics were covered in the Humboldt Scientific RSO training class you attended on date in city.

Specifically, the training covered several radiation safety topics using the Humboldt Scientific Portable Gauge training document in section 5 of your RSO binder. This covered a majority of safety topics mentioned in NUREG 1556, Volume 4, Revision 1, "Consolidated Guidance About Materials Licenses – Program-Specific Guidance About Fixed Gauge License.

You were also provided this NUREG in section 11 of your RSO binder and the training covered the topics of leak testing, shutter testing, Lock-out procedures, and routine versus non-routine maintenance.

The NRC correctly stated to you in its email that there are some hands-on (On-the-Job) training activities that should be completed at your facility.

Please don't hesitate to contact me at 800-537-4183 if you have any questions.

Sincerely,

Mahir Al-Nadaf
VP/RSO
