Docket No. 50-341

The Detroit Edison Company
ATTN: Wayne H. Jens
Vice President
Nuclear Operations
2000 Second Avenue
Detroit, MI 48226

Gentlemen:

This refers to the routine preoperational safeguards inspection conducted by Messrs. T. J. Madaea and B. W. Stapleton of this office on March 12-16, and 28, 1984, of activities at Enrico Fermi Atomic Power Plant, Unit 2, authorized by NRC Construction Permit No. CPPR-87 and to the discussion of our findings with Mr. W. H. Jens and members of his staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No items of noncompliance with NRC requirements were identified during the course of this inspection. However, two areas continue to concern us and we request that you advise us in writing within thirty days of the date of this letter of the steps you have taken or intend to take to address the matter relating to the testing and maintenance of installed security related equipment (paragraph 6 of the Report Details) and the matter relating to records maintenance (paragraph 14). These matters were discussed during the exit interview on March 16, 1984 and during a telephone call between S. Leach of your staff and J. R. Creed of my staff on March 28, 1984.

Areas examined during this inspection concern a subject matter which is exempt from disclosure according to Section 73.21(c)(2) of the NRC's "Rules of Practice," Part 73, Title 10, Code of Federal Regulations. This information must be handled and protected in accordance with the provisions of 10 CFR 73.21. Consequently, our report of this inspection will not be placed in the Public Document Room.
