

MEMORANDUM FOR: Donald P. Cleary, Section Leader, RIAS, CBAB, DSE
 FROM: Michael Kaltman, RIAS, CBAB, DSE
 SUBJECT: SITE VISIT TO MIDLAND MICHIGAN

50-329/330

From March 23 to March 25 I visited Midland, Michigan for the purpose of evaluating past and prospective community impacts associated with the construction of the Midland Nuclear Station. Tom Cook, Consumer Power's supervisor of construction, answered a number of questions concerned with operational aspects of constructing the station and then gave me a guided tour of the site. The site tour was followed by a series of interviews with Midland City and County officials (a list of persons interviewed is attached). Finally, I monitored traffic in the area of the plant during the Thursday afternoon end of shift.
