Docket Nos.: 50-329
50-330

MEMORANDUM FOR: S. Varga, Chief, Light Water Reactors Branch No. 4,
Division of Project Management

FROM: C. J. Heltmes, Jr., Chief, Quality Assurance Branch,
Division of Project Management

SUBJECT: REVIEW OF CHANGES TO QA PROGRAM FOR MIDLAND PLANT
UNIT NOS. 1 AND 2

Applicant: Consumers Power Company (CPC)
Licensing Stage: CP
Responsible Branch: LWR #4
Review Status: Review of Changes Completed

The Quality Assurance Branch has reviewed the proposed changes to the QA program for the Midland Plant, Unit Nos. 1 and 2 submitted to NRC from CPC in a letter dated May 16, 1977 from S. Howell to R. Boyd. The QA program for the Midland Plant incorporates the previously accepted topical reports of CPC (Revision 5) and Bechtel Power Corporation (Revision 1A). It is our understanding that the Babcock & Wilcox Topical Report (Revision 3) accepted by NRC July 8, 1977 will be fully implemented on or before August 8, 1977 (reference Attachment B, paragraph IIC of the May 16, 1977 letter). As a result of our review and evaluation of the proposed changes stated in the May 16, 1977 letter, we find the QA program acceptable for the design and construction phase of Midland Plant, Unit Nos. 1 and 2.
