Docket No: 50-329  
50-330

APR 27 1977

**MEMORANDUM FOR:** S. Varga, Chief, Light Water Reactors Branch #4,  
Division of Project Management

**FROM:** C. J. Maltamas, Jr., Chief, Quality Assurance Branch,  
Division of Project Management

**SUBJECT:** REVIEW OF CHANGES TO QA PROGRAM FOR MIDLAND PLANT, UNIT  
NOS. 1 & 2

Applicant:	Consumers Power Company (CPC)
Licensing Stage:	CP
Responsible Branch:	LWR #4
Project Manager:	R. Powell
Requested Completion Date:	April 18, 1977
Review Status:	Review of Changes Completed

The Quality Assurance Branch has reviewed the proposed changes to the QA program for the Midland Plant, Unit Nos. 1 & 2, submitted to NRC from CPC in a letter dated March 23, 1977, from R. C. Bauman to R. Boyd. The QA program description for the Midland plant incorporates the previously accepted typical reports of CPC, and Bechtel Power Corporation, and the revised Babcock and Wilcox QA typical report (BAM-10096A, Revision 3) which the QAB anticipates acceptance in April 1977. Based upon the expected acceptance of Revision 3 to the B & W typical report, and the review of the proposed changes as stated in the March 23, 1977, letter, we find the QA program acceptable for the design and construction phase of Midland Plant, Units Nos. 1 and 2.
