

APPENDIX A
NOTICE OF VIOLATION

United Technologies
Hamilton Standard
Windsor Locks, Connecticut 06096

Docket No. 030-03803
License No. 06-08170-01

As a result of the inspection conducted on June 4 and 6, 1984, and in accordance with the NRC Enforcement Policy (10 CFR 2, Appendix C), the following violations were identified:

- A. Condition 14 of License No. 06-08170-01 requires that sealed sources containing byproduct material be tested for leakage and/or contamination at intervals not to exceed six months.

Contrary to the above, as of June 4, 1984, Ni-63 sealed sources contained in your two gas chromatographs had not been tested for contamination or leakage since September 9, 1983, an interval of more than six months.

This is a Severity Level IV violation (Supplement VI).

- B. Condition 17 of License No. 06-08170-01 requires that licensed material possessed and used in accordance with statements, representations and procedures contained in an application dated May 8, 1981. Item 11 requires that the Eberline E-140 G-M survey meter or an equivalent meter be calibrated three times a year and that the Victoreen 470 ionization chamber or its equivalent be calibrated annually.

Contrary to the above, on June 4, 1984, the Eberline E-140 G-M survey meter had not been calibrated nor could records of calibration be located and the Victoreen 470A had not been calibrated since November 17, 1980, a period of more than one year, and it was inoperable as a result of dead batteries.

This is a Severity Level IV violation (Supplement VI).

- C. 10 CFR 19.11(a) and (b) require that current copies of Part 19, Part 20, the license, license conditions, documents incorporated into the license, license amendments and operating procedures be posted, or that a notice describing these documents and where they may be examined be posted.

Contrary to the above, on June 4, 1984, neither the documents nor the notices were posted.

This is a Severity Level V violation (Supplement VI).
