Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Inspection of BWR Stainless Steel Piping
Shoreham Nuclear Power Station - Unit 1
Docket No. 50-322

Reference: Generic Letter 84-11, April 19, 1984

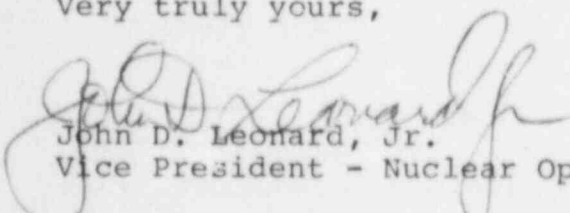

Dear Mr. Denton:

In a prior telephone conversation between your Mr. R. Caruso and Mr. R. Grunseich of LILCO, the staff agreed to an extension of the response due date to Generic Letter 84-11, "Inspection of BWR Stainless Steel Piping." This delay was necessary to clarify certain points of the generic letter with the staff. It was also agreed that LILCO would provide the NRC with a revised submittal date pending internal LILCO review of these clarifications.

Based on this review, LILCO is requesting the submittal date be extended to July 2, 1984.

If you have any questions or require additional information, please do not hesitate to call this office.

Very truly yours,

John D. Leonard, Jr.
Vice President - Nuclear Operations
