

NOTICE OF VIOLATION

Commonwealth Edison Company
Quad Cities Nuclear Power Station,
Units 1 and 2

Docket Nos. 50-254; 50-265
Licenses No. DPR-29; DPR-30

During an NRC inspection conducted on January 27-31, 1992, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1991), the violation is listed below:

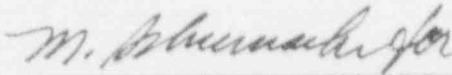

10 CFR 20.203(c)(2)(iii) requires in part that, in the absence of certain specified control devices, each entrance or access point to a high radiation area be maintained locked except during periods when access to the area is required with positive control over each individual entry.

Contrary to the above, on several occasions in 1991, in the absence of the specified control devices, doors to high radiation areas were not locked or controlled to prevent unauthorized entry.

This is a Severity Level IV violation (Supplement IV).

Pursuant to the provisions of 10 CFR 2.201, Commonwealth Edison Company is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington D.C. 20555 with a copy to the U. S. Nuclear Regulatory Commission, Region III, 799 Roosevelt Road, Glen Ellyn, Illinois, 60137, and a copy to the NRC Resident Inspector at the Quad Cities Nuclear Power Station, Units 1 and 2, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order or a Demand For Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Dated at Glen Ellyn, Illinois
this 22nd day of February 1992

L. Robert Greger, Chief
Reactor Programs Branch
