FEB 12 1982

MEMORANDUM FOR: Thomas P. Speis, Assistant Director for Reactor Safety, DSI  
 FROM: Roger J. Mattson, Director, Division of Systems Integration  
 SUBJECT: RESPONSE TO UDALL LETTER OF FEBRUARY 5, 1982

Attached is an assignment memo of February 11 from Gus Lafnas in DL. It asks us to prepare draft input for an agency response to the subject letter. We are specifically assigned questions 10, 11 and part of 17. The due date for our input on these three questions is February 17. Please prepare your response by February 16, so I have a day for review. I believe you will also have an interest in questions 2, 5, 6, 7, 8, part of 13, 14, 15, and 18. Please check with Lafnas to see if we can help with these additional questions and, if not, ascertain how and when we will be able to review the draft responses.

By copy of this memo, I am alerting Les Rubenstein that he should pursue the same course on question 9 pertaining to water level indicators; i.e., confer with Lafnas and see if we can help.

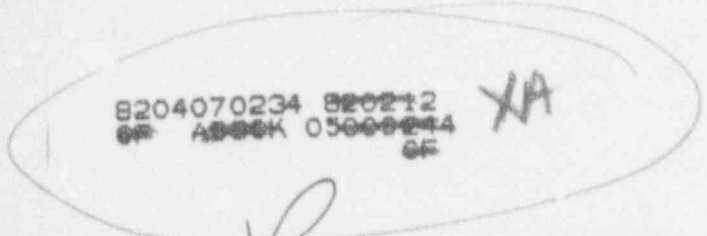

Original Signed by:  
 Roger J. Mattson
