Mr. W. L. Stewart, Vice President  
 Nuclear Operations  
 Virginia Electric and Power Company  
 P. O. Box 26666  
 Richmond, Virginia 23261

Dear Mr. Stewart:

Subject: Surry Power Station-Regulatory Effectiveness Review

From September 19-23, 1983, NRC Safeguards Division staff conducted a Regulatory Effectiveness Review at the Surry Power Station Units 1 and 2. The findings of that review are documented in the enclosed Part I, Safeguards Systems Effectiveness Review, and Part II, Vital Area Definition documents.

While a number of strengths were observed in the safeguards program, certain safeguards matters were found that warrant further consideration. Accordingly, it is requested that you provide comments relative to those areas needing attention identified in the above reports. To assist in your consideration of findings in the Regulatory Effectiveness Review report, some suggestions as to possible corrective measures are also enclosed. It should not be inferred that these are the only acceptable solutions. A timely response will be appreciated.

The reporting and/or recordkeeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P.L. 96-511.

The enclosures to this letter contain Safeguards Information of a type specified in 10 CFR 73.21 and must be protected against unauthorized disclosure.

Sincerely,

Steven A. Varga, Chief  
 Operating Reactors Branch No. 1  
 Division of Licensing

Enclosure(s) contain(s)

**SAFEGUARDS INFORMATION**, Decontrolled  
 when separated from attachments.
