Gentlemen:

Subject: VIRGIL C. SUMMER NUCLEAR STATION
APPLICATION FOR APPROVAL TO INCINERATE
CONTAMINATED OIL (REM-890022-2)

In accordance with the requirements of 10CFR20.302(a) and 10CFR20.305, South Carolina Electric & Gas Company (SCE&G) requests approval to incinerate oil contaminated with very low levels of licensed radioactive materials. The proposed incinerator will be located within the Site Area Boundary of the Virgil C. Summer Nuclear Station (VCSNS) and will be dedicated to the disposal of slightly contaminated oil from sources such as the reactor coolant pump motors.

The approval to incinerate contaminated oil at VCSNS was initially requested in a letter to your office dated January 4, 1990. This request was rejected by your letter dated May 17, 1990, primarily because the plans appeared to be too conceptual to support a review, and that no Technical Specification changes were included for establishment of sampling analysis and dose limitations. This submittal addresses these comments. Please note that since Amendment Number 104 to the facility operating license relocated the radiological effluent technical specifications to the Offsite Dose Calculation Manual (ODCM), the changes to the Technical Specifications recommended by your letter dated May 17, 1990 have been proposed for the ODCM. These ODCM changes have been reviewed and evaluated under the VCSNS 10CFR50.59 program.

Attached for your review are copies of the application which include the Dose Calculations for the Oil Incinerator (Attachment I) and the affected pages of the ODCM (Appendix A).

Should you need any additional information to process this application, please contact Ms. Susan B. Reese at (803) 345-4591.

Very truly yours,

John L. Skolds
