Your assistance is requested in conducting a review of the enclosed submittals from Northeast Nuclear Energy Company dated March 12 and May 4, 1984. Copies of these memos have been forwarded previously to D. Haverkamp under separate cover. It is our understanding from discussions with D. Haverkamp that a substantial amount of work has already been done. The product expected as a result of your review is a completed safety evaluation. Your reviewers should use the Standard Review Plan (SRP) and Standard Technical Specifications (STS) as guidance in determining acceptance criteria, recognizing that, for operating reactors, the criteria in these documents are not requirements.

In accordance with NRR Office Letter No. 44, each safety evaluation performed by a technical division shall have a separate SALP input provided. For purposes of these reviews, the Regional personnel involved are considered part of the technical divisions. Therefore, we are requesting that your forwarding memorandum contain a SALP input for each safety evaluation performed.

Work for this review effort should continue to be charged under TAC 51574. The requested completion date is August 31, 1984. Please notify me as soon as possible if this completion date is acceptable. Any contact with the licensee on this review effort or any additional information deemed necessary should be obtained through the NRR Project Manager. The Project Manager for this plant is D. B. Osborne and he can be reached at 492-9547 (FTS).
