## AVAILABILITY NOTICE

### Availability of Reference Materials Cited in NRC Publications

Most documents cited in NRC publications will be available from one of the following sources:

1. The NRC Public Document Room, 2120 L Street, NW., Lower Level, Washington, DC 20555
2. The Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013-7082
3. The National Technical Information Service, Springfield, VA 22161

Although the listing that follows represents the majority of documents cited in NRC publications, it is not intended to be exhaustive.

Referenced documents available for inspection and copying for a fee from the NRC Public Document Room include NRC correspondence and internal NRC memoranda; NRC bulletins, circulars, information notices, inspection and investigation notices; licensee event reports; vendor reports and correspondence; Commission papers; and applicant and licensee documents and correspondence.

The following documents in the NUREG series are available for purchase from the GPO Sales Program: formal NRC staff and contractor reports, NRC-sponsored conference proceedings, international agreement reports, grant publications, and NRC booklets and brochures. Also available are regulatory guides, NRC regulations in the *Code of Federal Regulations*, and *Nuclear Regulatory Commission Issuances*.

Documents available from the National Technical Information Service include NUREG-series reports and technical reports prepared by other Federal agencies and reports prepared by the Atomic Energy Commission, forerunner agency to the Nuclear Regulatory Commission.

Documents available from public and special technical libraries include all open literature items, such as books, journal articles, and transactions. *Federal Register* notices, Federal and State legislation, and congressional reports can usually be obtained from these libraries.

Documents such as theses, dissertations, foreign reports and translations, and non-NRC conference proceedings are available for purchase from the organization sponsoring the publication cited.

Single copies of NRC draft reports are available free, to the extent of supply, upon written request to the Office of Administration, Distribution and Mail Services Section, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Copies of industry codes and standards used in a substantive manner in the NRC regulatory process are maintained at the NRC Library, 7920 Norfolk Avenue, Bethesda, Maryland, for use by the public. Codes and standards are usually copyrighted and may be purchased from the originating organization or, if they are American National Standards, from the American National Standards Institute, 1430 Broadway, New York, NY 10018.

## ABSTRACT

The Historical Data Summary of the Systematic Assessment of Licensee Performance (SALP) is produced periodically by the U.S. Nuclear Regulatory Commission. This summary provides the results of the assessment for each facility by NRC region and is further divided into the following sections: Section 1 presents the most recent SALP report ratings for facilities in operation and under construction. Section 2 presents a chronological listing of all SALP report ratings for each operating facility. Section 3 presents a chronological listing of all SALP report ratings for each facility under construction. For historical purposes, past construction ratings for facilities that recently have been licensed also are listed in Section 3.

## TABLE OF CONTENTS

Introduction	vii
Section 1, SALP Summary: Most Recent Ratings	1-1
Section 2, SALP History: Facilities In Operation	2-1
Section 3, SALP History: Facilities Under Construction	3-1

## INTRODUCTION

### Organization

The Historical Data Summary of the Systematic Assessment of Licensee Performance (SALP) is produced periodically by the U.S. Nuclear Regulatory Commission (NRC). This summary provides the results of the assessment for the period July 1, 1991 through December 31, 1991. The results are presented for each facility in three sections and are further divided by NRC region. Section 1 presents the most recent SALP report ratings for facilities in operation and under construction. Section 2 presents a chronological listing of all SALP report ratings for each operating facility. Section 3 presents a chronological listing of all SALP report ratings for each facility under construction. For historical purposes, past construction SALP ratings for facilities that recently have been licensed also are listed in Section 3.

### Background

The SALP program is an integrated NRC staff effort to collect and evaluate observations and data to assess and better understand the reasons for a licensee's performance. The program is described in Manual Chapter 0516, which was revised in June 1988, in August 1989, and again in September 1990. The purpose of the program is to assess licensee performance in selected functional areas. Prior to the June 1988 revision to the Manual Chapter, the areas for facilities in operation generally included plant operation (OPS), radiological controls (RADCON), maintenance (MAINT), surveillance (SURV), emergency preparedness (EP), fire protection (FP), security (SEC), outages (OUTG), quality programs and administrative controls affecting quality (QP), licensing activities (LIC), and training and qualification effectiveness (TRG). These functional areas were revised in number and scope in the June 1988 revision. For facilities in operation that have been evaluated since the June 1988 revision to the Manual Chapter, the areas generally include plant operations (OPS), radiological controls (RADCON), maintenance/surveillance (M/S), emergency preparedness (EP), security (SEC), engineering/technical support (ET), and safety assessment/quality verification (SQ).

The functional areas for facilities under construction, prior to the June 1988 revision to Manual Chapter 0516, are soils and foundations (SF); containment, safety-related structures, and major steel supports (CONT); piping systems and supports (PIPE); safety-related components (SRC); auxiliary systems (AUX); electrical equipment and cables (ELEC); instrumentation (INST); design engineering (DSN); quality assurance and administrative controls affecting quality (QA); and licensing activities (LIC). The functional areas under the June 1988 revised Manual Chapter 0516 are soils and foundations; containment, major structures and major steel supports; piping systems and supports;

mechanical components; auxiliary systems; electrical equipment and cables; instrumentation; engineering/technical support; and safety assessment/quality verification. However, no SALPs of facilities under construction have been completed under the revised Manual Chapter.

Based on a review of the consolidated information, each evaluated functional area is placed into one of three performance categories. A Category 1 rating designates a superior level of performance where reduced NRC attention may be appropriate. A Category 2 rating designates a good level of performance where NRC attention should be maintained at normal levels. A Category 3 rating designates an acceptable level of performance where NRC will consider increased levels of inspection effort. An "N" indicates that no rating was given for that category because of lack of meaningful data or the functional area is not appropriate for this SALP cycle. An "X" in place of a category rating indicates that a rating was not given for a reason other than that corresponding to an "N." The reason for an "X" is provided with a footnote in the SALP history and explained in detail in the SALP report.

Same as above

10. SUPPLEMENTARY NOTES

11. ABSTRACT (200 words or less)

The Historical Data Summary of the Systematic Assessment of Licensee Performance (SALP) is produced periodically by the U.S. Nuclear Regulatory Commission. This summary provides the results of the assessment for each facility by NRC region and is further divided into the following sections: Section 1 presents the most recent SALP report ratings for facilities in operation and under construction. Section 2 presents a chronological listing of all SALP report ratings for each operating facility. Section 3 presents a chronological listing of all SALP report ratings for each facility under construction. For historical purposes, past construction ratings for facilities that recently have been licensed also are listed in Section 3.

12. KEY WORDS/DESCRIPTORS (List words or phrases that will assist researchers in locating the report.)

Systematic Assessment of Licensee Performance (SALP)
