

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION III  
799 ROOSEVELT ROAD  
GLEN ELLYN, ILLINOIS 60137

December 7, 1983

MEMORANDUM FOR: Harold R. Denton, Director, Office of Nuclear Reactor  
Regulation

FROM: James G. Keppler, Regional Administrator, Region III

SUBJECT: PETITION FOR EMERGENCY RELIEF (LASALLE)  
FROM EDWARD M. GOGOL

Attached is a Petition for Emergency Relief from Edward M. Gogol raising concerns regarding containment leak rate testing. The concerns appear to be both generic and directed at LaSalle. There is also a request for certain documents regarding the Byron plant. In view of the relief requested, it appears that the petition should be treated under 10 CFR 2.206.

We are transmitting the petition to you for action, since it appears to Region III that the plant specific matters raised in the petition would be within the cognizance of the Containment Systems Branch, DSI/NRR.

As backup material, we are putting in the mail to you (with a copy to IE and ELD) the following documents:

- . Inspection Report 50-373/82-25 (June 9, 1982)
- . Commonwealth Edison response to 50-373/82-25 (July 7, 1982)
- . Letter acknowledging Commonwealth Edison response (July 21, 1982)
- . Inspection Report 50-373/82-32 (July 29, 1982)
- . Inspection Report 50-373/83-28; 50-374/83-23 (DE) (July 28, 1983)
- . Commonwealth Edison response to 50-373/83-28; 50-374/83-23 (August 24, 1983)
- . Letter acknowledging Commonwealth Edison Response (September 2, 1983)

Please coordinate the response to this petition with Roger Walker, Region III, (FTS 388-7565).

James G. Keppler  
Regional Administrator
