Entergy Operations, Inc.
ATTN: Mr. W. T. Cottle, Vice President
Nuclear Operations - Grand Gulf
P. O. Box 756
Port Gibson, MS 39150

Gentlemen:

SUBJECT: FEMA OFFSITE EXERCISE REPORTS FOR GRAND GULF NUCLEAR POWER STATION

Please find enclosed copies of the Federal Emergency Management Agency's (FEMA) Reports for the offsite Mississippi and Louisiana portions of the Grand Gulf Nuclear Power Station Exercise conducted on August 28-29, 1991.

For the Mississippi portion, a deficiency involving Claiborne County's failure to notify appropriate local officials upon receipt of the Alert emergency classification from the utility was identified during the exercise. It was corrected in a remedial exercise conducted November 20, 1991.

There were three Areas Requiring Corrective Action (ARCA) identified during the August 28-29, 1991 exercise. These ARCAs relate to field monitoring team radios, alert and notification of the public in Claiborne County, and demonstration of the congregate care facility in Hinds County.

For the Louisiana portion, there were no deficiencies identified during the exercise; however, there were five ARCAs. ARCAs were identified at the State Emergency Operations Center (EOC) for mobilization of the full EOC staff and shift change for those staff that did not mobilize, and at the Tallulah Reception Center for cross contamination due to traffic flow, issuance of dosimetry, and monitoring and decontamination techniques.

We encourage you to assist the appropriate organizations in resolving the corrective actions and improvement items identified by FEMA. Resolution of these items should be completed prior to the next full-scale emergency preparedness exercise.

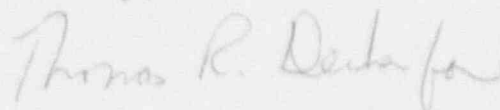

We also encourage you to work closely with the State and counties in the development of a scenario for the next full-scale exercise that will effectively test the areas in which the above items were disclosed.
