

MAY 9 1984

MEMORANDUM FOR: Themis P. Speis, Director  
Division of Safety Technology  
Office of Nuclear Reactor Regulation

FROM: Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation

SUBJECT: PROPOSED RULE CHANGE TO 10 CFR PART 50.36  
(TECHNICAL SPECIFICATIONS)

Your memorandum of March 29, 1984, subject "Control of NRC Rulemaking," enclosed an EDO memorandum on rulemaking and requested certain information needed to obtain EDO approval to begin and continue each rulemaking. One of the rulemaking topics identified in your memorandum was "Technical Specifications for Nuclear Power Plants."

As noted in my April 9, 1984 memorandum to Harold R. Denton, subject "STS Section Responsibilities, Workload and Resources," we have suspended effort on this rulemaking topic due to the disparity between our present workload and available resources. We do not expect to resume effort on this topic before the end of 1984, and when we do resume such effort, we may recommend an approach other than rulemaking. Should we decide to proceed with the rulemaking approach, we will provide the requested information at that time.
