and 50-278

LICENSEE: Philadelphia Electric Company

FACILITY: Peach Bottom Atomic Power Station, Units 2 and 3

SUBJECT: MEETING SUMMARY OF THE JANUARY 6, 1984 MEETING WITH  
PHILADELPHIA ELECTRIC COMPANY

Members of the NRC staff met with representatives of Philadelphia Electric Company (PECO or the licensee), on January 6, 1984. A list of the meeting attendees is provided as Enclosure 1. The purpose of this meeting was to discuss a one-time exemption from certain Appendix J requirements requested by the licensee. The licensee provided (Enclosure 2) a background of its problems conducting the scheduled Appendix J on selected Main Steam Line Isolation Valves (MSIV's) due to extended outage problems as well as a summary of its MSIV maintenance program and the latest MSIV test results. In addition, the licensee presented its approach in providing compensatory measures to support its exemption request.

Based upon the licensee's presentation, the staff indicated that it would review the data and documentation presented at this meeting and would promptly inform the licensee of its decision concerning this exemption request.
