Dear Mr. Beck:

SUBJECT: EMERGENCY RESPONSE DATA SYSTEM IMPLEMENTATION PLAN, PEACH BOTTOM
ATOMIC POWER STATION, UNITS 2 AND 3, AND LIMERICK GENERATING
STATION, UNITS 1 AND 2

The U.S. Nuclear Regulatory Commission (NRC) has reviewed the Emergency Response Data System (ERDS) implementation plan for the Peach Bottom Atomic Power Station, Units 2 and 3, and the Limerick Generating Station, Units 1 and 2, which you submitted in a letter dated December 6, 1991. Based upon this review, the NRC has found that your implementation plan provides the basis for an acceptable implementation of ERDS at your facilities. One item which requires clarification is the area of telephone line installation. The telephone lines which are being installed for ERDS will be installed by the American Telephone and Telegraph Company (AT&T) as described in Generic Letter 91-14, not by the NRC ERDS contractor, Halliburton NUS Environmental Corporation as stated in your implementation plan. Further information concerning telephone line installation may be obtained by contacting Mr. Thomas Baldesi of the Telecommunications Branch at (301) 492-7121.

Be advised that the testing phase of ERDS implementation involves all licensees testing with the NRC contractor, Halliburton NUS Environmental Corporation. Since the contractor does not have unlimited resources for testing multiple ERDS links simultaneously, close coordination with the Halliburton NUS personnel in scheduling your ERDS testing will be a key element in the successful completion of ERDS implementation. The project manager at Halliburton NUS is Mr. Tony LaRosa, and he may be reached at (208) 524-9227.
