Docket No. 50-336

March 23, 1992

MP-92-311

U.S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, D.C. 20555

Gentlemen:

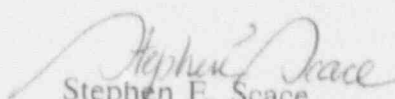

Millstone Nuclear Power Station, Unit No. 2  
Core Operating Limits Report - Revision 4

The Millstone Unit No. 2 Core Operating Limits Report (COLR) has been revised to change the Total Integrated Radial Peaking Factor ( $F_r^T$ ) limit. An error was recently discovered between the wording used in the Technical Specification requirements for  $F_r^T$  and the assumptions used in the plant safety analyses. Past plant operation was reviewed, and it was determined that the plant was always operated within the assumptions used in the safety analyses with respect to the  $F_r^T$  requirements. This revision clarifies the  $F_r^T$  limit, as well as the power dependent  $F_r^T$  limits which are to be used in the specification ACTION statement.

In accordance with the Millstone Unit No. 2 Technical Specifications, Section 6.9.1.7.d, NNECo hereby submits Revision 4 to the Millstone Unit No. 2 COLR.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY

  
Stephen E. Scace  
Director, Millstone Station
