

ENCLOSURE 1

NOTICE OF VIOLATION

Georgia Institute of Technology
GTTR

Docket No. 50-160
License No. R-97

The following violations were identified during an inspection conducted on March 13-15 and March 21, 1984. The Severity Levels were assigned in accordance with the NRC Enforcement Policy (10 CFR Part 2, Appendix C).

1. Technical Specification 6.4.b., requires written procedures shall be provided and utilized for nine areas of reactor operation listed as 6.4.b.(1) through 6.4.b.(9). This specification implies adequate procedures.

Contrary to the above, the following procedures were found to be deficient:

- Procedure 7207, "Control Rod Drop Time" was incomplete in that it did not contain instructions for setup and adjustment of special timing equipment on which rod drop time measurement is dependent.
- Procedure 4000, "Containment Building Pressure Test" for 1981 contained several pen and ink changes, and the same changes had been made to a working copy of the 1983 test. Although the changes were not substantive, the use of pen and ink changes over a three-year period represents an inadequate procedure.

This is a Severity Level V violation (Supplement 1).

2. Technical Specification 6.2.c requires the Nuclear Safeguards Committee to meet quarterly and to distribute written records of the proceedings to all committee members including the President of Georgia Tech.

Contrary to the above, as of March 15, 1984, the Nuclear Safeguards Committee had not met since October 17, 1983, and meeting minutes had not been sent to the President of the University since July of 1983.

This is a Severity Level V violation (Supplement 1).

Pursuant to 10 CFR 2.201, you are required to submit to this office within 30 days of the date of this Notice, a written statement or explanation in reply, including: (1) admission or denial of the alleged violations; (2) the reasons for the violations if admitted; (3) the corrective steps which have been taken and the results achieved; (4) corrective steps which will be taken to avoid further violations; and (5) the date when full compliance will be achieved.
