Gentlemen:

SUBJECT: REPORT NOS. 50-250/84-01 AND 50-251/84-01

Thank you for your response of March 30, 1984, to our Notice of Violation issued on February 29, 1984, concerning activities conducted under NRC Operating License Nos. DPR-31 and DPR-41. Your response to the second violation concurs with the finding with an exception that Health Physics personnel are not responsible for dose calculations in an emergency. We agree with your comment yet during one interview a Plant Supervisor did, in fact call upon a HP staff member to perform the calculations. We have considered your position and, based on our review, affirm the violation as stated. Evaluation of your response to the first violation found that it meets the requirements of 10 CFR 2.201. We will examine the implementation of your corrective actions during future inspections.

We appreciate your cooperation in this matter.

Sincerely,

Richard C. Lewis, Director
Division of Reactor Projects
