UNITED STATES NUCLEAR REGULATORY COMMISSION

TENNESSEE VALLEY AUTHORITY

SEQUOYAH NUCLEAR PLANT, UNITS 1 AND 2

DOCKET NOS. 50-327/328

NOTICE OF WITHDRAWAL OF A PROVISION OF AN AMENDMENT REQUEST
TO FACILITY OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (NRC) has approved the withdrawal of a portion of a Technical Specification (TS) amendment request by the Tennessee Valley Authority (TVA or the licensee), to Facility Operating License Numbers DPR-77 and DPR-79, issued to the Sequoyah Nuclear Plant, Units 1 and 2, respectively. The plant is located in Soddy Daisy, Tennessee. Notice of Consideration of Issuance of this amendment was published in the FEDERAL REGISTER on February 21, 1990 (53 FR 6118).

The item being withdrawn was originally included in an amendment request dated January 22, 1990, and requested that the wide-range containment pressure and reactor vessel level instrumentation be removed from TS Table 3.3-10. However, in the NRC staff's letter dated December 7, 1990, which forwarded Amendment Numbers 149 and 135 (and approved other TS changes requested in the January 22, 1990 application), the staff disagreed with the licensee's request to delete the instrumentation and requested that the licensee withdraw this item from the amendment request. By letter dated April 12, 1991, the licensee has withdrawn this item from the original amendment request.

For further details with respect to this action, see (1) the application for amendment dated January 22, 1990, (2) the staff's letter forwarding Amendment
