Mail Stop 8E/EP4
Omaha, Nebraska 68102-2247

Gentlemen:

This refers to the inspection conducted by Mr. A. B. Earnest of this office during the period April 22-26, 1991, of activities authorized by NRC Operating License DPR-40 for Fort Calhoun Station, and to the discussion of our findings with members of your staff at the conclusion of the inspection.

Areas examined during the inspection are identified in the enclosed report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of the inspection, no violations or deviations were identified. The inspector expressed a concern in reference to the delays being encountered by your staff in correcting several detection and camera zones that are presently under compensatory measures. The compensatory measures for the inadequate detection aids and camera zones have exceeded 2 months in several of the zones. Your staff made a commitment to evaluate the concern in order to determine the cause of the delays.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR Part 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material will not be placed in the Public Document Room.
