Dear Mr. Hairston:

SUBJECT: LARGE BREAK LOCA ANALYSIS ERROR CORRECTION FOR JOSEPH M. FARLEY
NUCLEAR PLANT, UNIT 2 (TAC M79815)

By letter dated February 10, 1991, you notified us of an error in the calculation of the large break loss-of-coolant accident (LOCA) peak cladding temperature for the Joseph M. Farley Nuclear Plant (Farley), Unit 2. In your letter, you described the updated analysis correcting the error. Based on the review of information in that submittal and supplemental information provided in a June 17, 1991, submittal, we find that the revised Farley, Unit 2, large break LOCA analysis was performed using acceptable methods and that the calculated results meet the requirements of 10 CFR 50.46(b). Our evaluation of your submittals is contained in the enclosed Safety Evaluation. This letter completes our action on this issue and TAC No. M79815 is closed.

Sincerely,

Original signed by

Stephen T. Hoffman, Project Manager
Project Directorate II-1
Division of Reactor Projects I/II
Office of Nuclear Reactor Regulations
