Docket No. 50-285/92-05
License No. DPR-40

Omaha Public Power District
ATTN: W. G. Gates, Division Manager
Nuclear Operations
444 South 16th Street Mall
Mail Stop 8E/EP4
Omaha, Nebraska 68102-2247

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-285/92-05

This refers to the inspection conducted by Messrs. R. Mullikin and R. Azua of this office during February 2 through March 14, 1992. The inspection included a review of activities authorized for your Fort Calhoun Station facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the enclosed report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations of activities in progress.

During the current refueling outage, you installed a temporary diesel generator to enhance your offsite power supply capability. Although not a regulatory requirement, this action shows a heightened awareness to safety during shutdown activities and is a commendable practice.

Within the scope of this inspection, no violations or deviations were identified.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By:

A. B. BEACH

A. Bill Beach, Director
Division of Reactor Projects
