

April 2, 1992

Docket Nos. 50-445
and 50-446

LICENSEE: Texas Utilities Electric Company (TU Electric)
FACILITY: Comanche Peak Steam Electric Station (CPSES), Units 1 and 2
SUBJECT: SUMMARY OF MEETING ON COMBINED TECHNICAL SPECIFICATIONS FOR
COMANCHE PEAK UNITS 1 AND 2 AND OTHER LICENSING ISSUES

A meeting was held on February 18, 1992, to discuss TU Electric's combined Technical Specification (TS) submittal that will become effective at the time Comanche Peak Unit 2 receives its operating license (currently scheduled for December 1, 1992), and other licensing issues. Enclosure 1 is a list of attendees for this meeting.

A discussion of the major milestones associated with the completion of the combined TS (Enclosure 2) confirmed that the schedules were realistic and achievable. The staff explained the specific changes made to TU Electric's proposed combined TS submittal, which were included in the staff's first draft version of the combined TS (issued to the licensee by letter dated February 19, 1992).

The meeting ended with a request by the staff of the licensee to support a meeting during the week of April 13, 1992, to continue the discussion on the changes needed in order to have an acceptable and complete version of the combined TS at the time Comanche Peak Unit 2 is ready for its operating license.

Original Signed By

Mel B. Fields, Project Manager
Project Directorate IV-2
Division of Reactor Projects III/IV/V
Office of Nuclear Reactor Regulation
