

MAY 18 1984

MEMORANDUM FOR: Thomas M. Novak, Assistant Director
for Licensing
Division of Licensing

FROM: Frank J. Miraglia, Assistant Director
for Safety Assessment
Division of Licensing

SUBJECT: APPENDIX A TECHNICAL SPECIFICATIONS FOR
CALLAWAY UNIT 1 OPERATING LICENSE

The subject Technical Specifications are enclosed for incorporation in the Callaway Unit 1 operating license.

The Callaway Technical Specifications were developed utilizing Revision 4 to NUREG-0452, "Standard Technical Specifications for Westinghouse Pressurized Water Reactors," as a basis. They reflect design differences, new regulatory requirements, and operating experience not already incorporated in these Standard Technical Specifications. The Callaway Technical Specifications have been provided to the appropriate NRC technical review branches for review and written responses have been received from all review branches and from Region III.

These Technical Specifications were provided to the applicant for review in final draft form, incorporate the applicants' comments thereon, and have been certified by the applicant to accurately reflect the plant, FSAR as supplemented, and SER.

If you have any questions or if we can be of further assistance, please contact Fredric D. Anderson (x24570) of the Standardization and Special Projects Branch.
