ATTN: Mr. W. G. Hairston, III
Senior Vice President
Nuclear Operations
P. O. Box 1295
Birmingham, AL 35201-1295

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-348/92-04 AND 50-364/92-04

This refers to the inspection conducted by G. F. Maxwell of this office on January 31 through March 9, 1992. The inspection included a review of activities authorized for your Farley facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The enclosed inspection report identifies activities that appeared to violate NRC requirements but are not cited; therefore no response is required.

Both violations, one of which involved the incorrect placement of an incore detector and one involving a mispositioned solid state protection system multiplexer test switch, are not being cited because of prompt identification of the problem by your staff and the proper corrective actions taken to resolve these items.

In accordance with Section 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

ORIGINAL SIGNED BY
DAVID M. VERRELLI
