Re: 10CFR50.90

U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

Gentlemen:

Millstone Nuclear Power Station, Unit No. 2
Revision to Proposed Changes to Technical Specifications
Generic Letter 90-09, Snubber Visual Inspection Intervals

In a letter dated February 3, 1992,⁽¹⁾ Northeast Nuclear Energy Company (NNECO) submitted to the NRC Staff a proposed license amendment request related to snubber visual inspection intervals at Millstone Unit No. 2.

The purpose of this letter is to amend our February 3, 1992, license amendment request. Attachment No. 1 to this letter contains a revised Technical Specification page 3/4 7-32. This revised page supersedes the same page submitted with the February 3, 1992, letter. This revised page provides clarification of the title for Table 4.7-3. This information was inadvertently omitted from the February 3, 1992, submittal.

NNECO considers this an enhancement to the February 3, 1992, proposed license amendment; therefore, the significant hazards consideration review documented in the February 3, 1992, submittal remains fully applicable.

(1) J. F. Opeka letter to U.S. Nuclear Regulatory Commission, "Millstone Nuclear Power Station, Unit No. 2, Proposed Change to Technical Specifications, Generic Letter 90-09, Snubber Visual Inspection Intervals," dated February 3, 1992.

Aoo!
