SUMMARY

Scope:

This routine, unannounced inspection was conducted in the area of the Physical Security Program for Power Reactors. Specifically, Management Support, Audit, Barriers, Alarm, Assessment, Lighting, Compensatory Measures, and Training were reviewed.

Results:

In the areas inspected, one non-cited violation was identified relative to the annual quality assurance audit (92-05-01), one licensee identified violation relative to unsecured vital area doors will not be cited (92-05-02) and one unresolved item relative to handgun ammunition will be referred to NRC Headquarters for legal interpretation (92-05-03).

The licensee has an adequate security program, except as noted elsewhere in this Report, with strengths identified in the performance of the security force and camera assessment upgrade.
