Docket No. 50-271

Mr. Warren P. Murphy
Senior Vice President, Operations
Vermont Yankee Nuclear Power Corporation
RD 5, Box 169
Ferry Road
Brattleboro, Vermont 05301

Dear Mr. Murphy:

Subject: Inspection No. 50-271/91-25

This letter refers to the routine safety inspection conducted by Mr. J. Kottan of this office on September 23-27, 1991, of activities authorized by NRC License No. DPR-28 at the Vermont Yankee Nuclear Power Station, Vernon, Vermont, and to the discussions of our findings held by J. Kottan with Mr. R. Pagodin and others of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

In addition, our Mobile Laboratory was also brought to your site and used by the inspector to make certain independent measurements. The basic purpose of these independent measurements is to verify your capability for analyzing radioactive effluents, and to achieve and maintain comparable methods of analyses between your facility and the NRC. The complete data from these measurements will be reported in a subsequent Inspection Report.

Within the scope of this inspection, you had in place an effective program for measuring radioactivity in process and effluent samples. No violations were observed and no response is required to this letter.

Sincerely,

Original Signed By:
Richard R. Keimig
