

April 7, 1992

Docket Nos. 50-277, 50-278, 50-352  
and 50-353

LICENSEE: Philadelphia Electric Company  
FACILITY: Peach Bottom Atomic Power Station, Units 2 & 3, Limerick  
Generating Station, Units 1 & 2  
SUBJECT: SUMMARY OF MEETING WITH PHILADELPHIA ELECTRIC COMPANY (PECO)  
MANAGEMENT ON MARCH 18, 1992

At the request of Philadelphia Electric Company (PECO), senior management from NRC and PECO met to discuss several management issues. Dickinson Smith (PECO) opened the meeting by stating that in light of the recent escalated enforcement action at Peach Bottom Atomic Power Station, he wanted to make it clear that PECO is fully committed to the safety of all of its nuclear operations. He went on to explain several initiatives that have taken place at Peach Bottom, that he believes are paying dividends in improving safety, and the overall quality of operation of the facility. Areas discussed included modifications of systems, training of personnel, management changes and self assessment activities. He solicited feedback from NRC senior management concerning their views on the current state of Peach Bottom and Limerick Generating Station.

NRC management discussed their view that overall Peach Bottom and Limerick were being operated safely but there were some areas of concern at Peach Bottom. These included: resolution of Station Blackout, needed improvement in corrective actions once problems are identified and weaknesses identified in the recent IPAT inspection with regard to instrumentation out of service in the control room. The enclosure contains a list of attendees at the meeting.
