Docket No. 50-254
Docket No. 50-265

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Vice President
Post Office Box 767
Chicago, IL 60690

Gentlemen:

This refers to the special safety inspection conducted by Messrs. N. J. Chrissotimos and A. D. Morrongiello of this office on November 17, 1983, through January 24, 1984, of activities at the Quad Cities Nuclear Power Station, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-29 and No. DPR-30. Specifically, the inspection related to a violation of secondary containment integrity requirements. The results of this inspection were discussed during an enforcement conference conducted at the NRC Region III office on January 24, 1984. The report setting forth the results of the inspection and enforcement conference were forwarded to you by letter dated March 16, 1984.

The findings of the inspection were under review at that time to determine appropriate enforcement action. As a result of our review and in accordance with the revised enforcement policy, we have concluded that the issuance of a Notice of Violation is the appropriate enforcement action for the identified noncompliance with NRC requirements. These noncompliances are specified in the enclosed appendix. This Notice of Violation is transmitted to you in conjunction with inspection report 50-245/83-31(DPRP) and 50-265/83-30(DPRP). A written response is required.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure(s) will be placed in the NRC Public Document Room unless you notify this office, by telephone, within ten days of the date of this letter and submit written application to withhold information contained therein within thirty days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1). If we do not hear from you in this regard within the specified periods noted above, a copy of this letter and the enclosed inspection report will be placed in the Public Document Room.
