Dear Mr. Shelton:

SUBJECT: PROGRAMMED ENHANCEMENTS FOR GENERIC LETTER 88-17, "LOSS OF DECAY HEAT REMOVAL" (TAC NO. M69739)

The NRC staff has completed its review of all licensee responses regarding programmed enhancements as defined in Generic Letter (GL) 88-17, "Loss of Decay Heat Removal." The NRC staff review was based on a sampling of about one-third of all responses. Since the sample did not result in significant comments, the remainder of the responses will not be reviewed by NRR. NRC review of this phase of GL 88-17 will be accomplished as an inspection under Temporary Instruction (TI) 2515/103 in the NRC Inspection Manual. The inspection will take place after sufficient progress has been made for NRC to make a full assessment of your programmed enhancements. We note that by letter dated February 28, 1992, you informed the NRC staff that all actions in response to GL 88-17 were completed by September 11, 1991 for the Davis-Besse Nuclear Power Station, Unit 1. This letter constitutes the NRR report stated in paragraph 05.01 of TI 2515/103 as a prerequisite to the inspection under TI 2515/103.

Please contact us should you have any questions regarding this matter.

Sincerely,

Original Signed By:  
J. B. Hopkins

Jon B. Hopkins, Sr. Project Manager
