MEMORANDUM FOR: R. F. Warnick, Director, Special Cases Staff
FROM: J. R. Miller, Chief, Materials and Safeguards Branch
SUBJECT: ASSESSMENT OF S&W TO WORK AT MIDLAND
(DOCKET NO. 50-329; 50-330)

As requested, I have completed an audit of the competence of the individuals assigned by Stone & Webster to work on the "Third Party Construction Implementation Overview" at Midland.

Based on my discussions with given references and discussions with developed references, I could find nothing that would indicate that these persons should not perform the subject work.

In addition, I discussed the overall S&W effort with those persons in NRR who were responsible for developing Secy 82-414 (Diablo Canyon Design Verification Program - Phase II Recommendations). These NRC persons, in Enclosure 10 to Secy 82-414 indicated that S&W (and others) were acceptable.

Based on my review of affidavits for all parties concerned and my review of presented documentation, I cannot find any reason for not approving S&W to perform work at Midland.

J. R. Miller, Chief
Materials and Safeguards Branch
