*Handwritten initials and marks are present in the table cells and to the right of the table.*

We are in receipt of your memorandum of October 28 on the subject. (Encl. 1). It is our understanding that Mr. Saunders participated in a conference call with the NRC staff (see Enclosure 2) and the staff has evaluated his concerns. Based on this Geosciences Branch evaluation, we do not consider the issue identified by Mr. Saunders in the telecon with you to constitute new information regarding the Midland safety review. We have also obtained a copy of a memorandum documenting a telecon between OI and Mr. Saunders that contains, as an attachment, a statement of his concern. We are providing this to you for appropriate action.

This concludes the actions that we consider appropriate in regard to your memorandum of October 28, 1983.

*Darrell G. Eisenhut*  
 Darrell G. Eisenhut, Director  
 Division of Licensing
