NUCLEAR REGULATORY COMMISSION

REGION III
799 ROOSEVELT ROAD
GLEN ELLYN, ILLINOIS 60137

December 31, 1981

MEMORANDUM FOR: Deputy Regional Administrator's File

FROM:

A. Bert Davis, Deputy Regional Auministrator

SUBJECT:

TELEPHONE CALL FROM DENNIS SAUNDERS REGARDING MIDLAND

Mr. Saunders called to determine the status of his concerns regarding Midland. He was interested in any followup action that has transpired since our Notice of Violation. I told him that we would send him correspondence to and from the licensee and any subsequent inspection reports related to that Notice of Violation. It is requested that DETI send this information to Mr. Saunders.

Mr. Saunders also indicated that he had been told by an electrician that rats are eating the insulation on the electrical cables in the reactor building. It is requested that DETI determine whether this issue should be pursued.

Mr. Saunders also noted that there are salt mines under the reactor site which will effect the plant's seismic design. It is requested that DETI determine whether this matter should be pursued further.

Mr. Saunders indicated he would be in Washington next month on a small business conference. He indicated that he wanted to talk to Mr. Stello while he was there.

A. Bert Davis
