Dallas, Texas 75201

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-445/91-61; 50-446/91-61

This refers to the inspection conducted by Mr. H. F. Bundy of this office on November 18-22, 1991. This inspection included a review of activities authorized for your Comanche Peak Steam Electric Station, Units 1 and 2, facilities. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

The area examined during the inspection dealt with review of programmed enhancement in response to Generic Letter 88-17, "Loss of Decay Heat Removal."

Within the scope of the inspection, no violations or deviations were identified. An unresolved item involving the licensee's redefinition of the reactor coolant system level for reduced inventory conditions is discussed in paragraph 2.2.2 of the Appendix.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
A. B. Beach

A. Bill Beach, Director
Division of Reactor Projects
