

DEC 20 1991

Docket No. 50-440

Centerior Service Company  
ATTN: Mr. Michael D. Lyster  
Vice President  
Nuclear - Perry  
c/o The Cleveland Electric  
Illuminating Company  
10 Center Road  
Perry, OH 44081

SUBJECT: NRC INSPECTION REPORT NO. 50-440/911024(DRS)

Dear Mr. Lyster:

This refers to the routine safety inspection conducted by P. R. Rescheske and G. M. Nejjfelt from this office and B. E. Brett (SAIC Consultant), on December 2-6, 1991. The inspection included a review of activities authorized by NRC Operating License No. NPP-58 for the Perry Nuclear Power Plant. A discussion of our findings was held with you and members of your staff at the conclusion of the inspection.

The inspection focused on the effectiveness of operator training and useability of the Perry Emergency Operating Procedures (EOPs), and was conducted to complete the objectives of the NRC EOP Team Inspection which was performed in August 1991. The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No violations of NRC requirements were identified during the course of this inspection. Based on our observations of the accident scenarios performed by your operating staff on the Perry simulator, it was evident that the EOPs were understood by the operators and could be accomplished using existing equipment, controls, and instrumentation.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
