ATTN: Mr. H. B. Tucker, Vice President
Nuclear Production Department

Charlotte, NC 28242

Gentlemen:

SUBJECT: REPORT NOS. 50-369/84-08 AND 50-370/84-08

On March 25-29, 1984, NRC inspected activities authorized by NRC License Nos. NPF-9 and NPF-17 for your McGuire facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities violated NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are presented in the enclosed Notice of Violation. In view of your notification to us at the exit interview of your intent to contest the violation, a thorough review of applicable regulations was conducted by the Region II Staff. It was determined that the violation appeared to have occurred as stated in the attached report. Any information you provide in your response to the attached Notice of Violation, which is in addition to the details of the report will, of course, be taken into account in our review of that response.

In accordance with 10 CFR 2.790(d) and 10 CFR 73.21, safeguards activities and security measures are exempt from public disclosure; therefore, the enclosures to this letter, with the exception of the report cover page which presents a nonexempt summary, will not be placed in NRC's Public Document Room.

The responses directed by this letter and the enclosures are not subject to the clearance procedures of the Office of Management and Budget issued under the Paperwork Reduction Act of 1980, PL 96-511.

Should you have any questions concerning this letter, please contact us.

Sincerely,

Richard C. Lewis, Director
Division of Project and
