Docket No. 50-334, License No. DPR-66
Generic Letter 82-33; EOP Procedures Generation Package

Gentlemen:

Our submittal dated April 15, 1983 provided a schedule for completing the tasks identified in Supplement 1 to NUREG-0737. Included in those tasks was a projected date of June 1, 1984 for submitting the Emergency Operating Procedures, Procedures Generation Package (PGP). Supplement 1 requested the PGP be submitted at least three months prior to the date formal operator training on the upgraded procedures is to begin.

There has been recent NRC activity in the area of determining operator information and control needs as related to the development of emergency operating procedures. A clarification of the NRC's position on task analysis during the March 29 meeting between the WOG Procedures Subcommittee and members of the NRC staff has resulted in revisions to our PGP. For this reason, additional time is needed prior to submitting the Beaver Valley Unit 1 PGP. Therefore, we request that you revise the submittal date of our PGP to July 1, 1984. This change is necessary to permit additional reviews of the PGP which was recently revised to incorporate additional NRC concerns involving EOP task analysis.

Formal operator training on the upgraded EOPs is not scheduled to begin until 1985 following simulator validation which is to occur in the spring of that year and therefore is not affected by this schedule change. Additionally, this schedule change has been discussed with our NRC Project Manager and has been determined to be acceptable.

Should you have any questions concerning this submittal, please contact me or members of my staff.

Very truly yours,

J. J. Carey
Vice President, Nuclear
