SUBJECT: Arkansas Nuclear One - Unit 2
Docket No. 50-368
License No. NPF-6
Information Concerning CPC Upgrade Project

Gentlemen:

It is Entergy Operations' understanding that during the December 3 and 4, 1991, joint meeting of the Advisory Committee on Reactor Safeguards (ACRS) subcommittees on Computers in Nuclear Power Plant Operations and Advanced PWR subcommittees, several general questions were asked concerning the Core Protection Calculator (CPC) Upgrade Project at Arkansas Nuclear One, Unit 2 (ANO-2). To assist the ACRS, Entergy Operations is providing the following for your information.

- Attachment 1 is a copy of the overall description of change from the design change package which installed the CPC upgrade.
- Attachment 2 is an excerpt from the 10CFR50.59 evaluation performed for the upgrade.

Chapter 7 of the ANO-2 Safety Analysis Report contains a significant discussion of the CPCs if additional information is required.

Should you have any questions regarding this submittal, please contact me.

Very truly yours,

James G. Fisicaro
Director, Licensing
