Mr. T. C. McMeekin
Vice President, McGuire Site
Duke Power Company
12700 Hagers Ferry Road
Huntersville, North Carolina 28078-8985

SUBJECT: GENERIC LETTER 88-14, "INSTRUMENT AIR SUPPLY SYSTEM PROBLEMS
AFFECTING SAFETY-RELATED EQUIPMENT" - MCGUIRE NUCLEAR STATION,
UNITS 1 AND 2 (TAC NOS. M71679 AND M71680)

Your letters dated May 8, June 15, 1989; September 20, 1990; January 15,
April 15, August 12, and December 2, 1991, provide Duke Power Company's response
to Generic Letter (GL) 88-14 for the McGuire Nuclear Station, Units 1 and 2.
Your responses indicate that activities required to address the issues discussed
in the generic letter either have been performed or are scheduled to be implemented.
A detailed technical review of your response has not been performed and therefore,
this letter does not constitute approval of your response to GL 88-14. However,
based on a review of your responses, we conclude that you have addressed all of
the issues in the generic letter. Accordingly, your responses provide an
adequate basis for closure of the NRR licensing action on this matter. Further
NRC review, if any, will be through the inspection and audit process.

Since your response to GL 88-14 was not complete until the submittal of the
letter dated December 2, 1991, we request that the document retention period
addressed by the generic letter be extended until 2 years from that date to
support any further audit by the staff. Also, pursuant to GL 88-14, when all
requirements of the generic letter have been implemented, a written
notification should be provided to that effect.

Sincerely,

/s/

Timothy A. Reed, Project Manager
Project Directorate II-3
Division of Reactor Projects I/II
Office of Nuclear Reactor Regulation
